## POST MOULDS

### AM002 - 90mm Post Mould Capital - Small

### AM003 - 90mm Post Mould Capital - Large

### AM004 - 90mm Skirting Mould

**POST MOULDS ARE A ONE PIECE POLYURETHANE PRODUCT DESIGNED TO FIT OVER A 90MM POST BEFORE INSTALLATION.**

# Post Mould for 115mm Post

## Questions & Answers

Q : *What is it made of ?*

A : Rigid Polyurethane, which means it won't rot or split when out in the weather.

Q : *Does it need to be assembled ?*

A : No, it slides over a 115mm post during installation. If the post is already fixed in place you can cut the mould across the diagonal and then wrap around the post and use a gap filler to hide the joint.

Q : *How do you fix it to the post ?*

A : Exterior nails or screws will do. If the post is slightly under size you can use an exterior filler to hide any gaps.

Q : *How do I paint it ?*

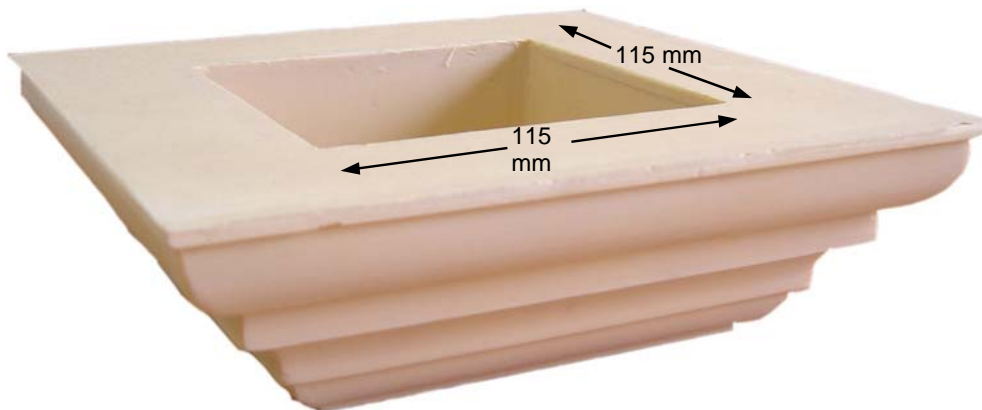

A : The exact same way you paint the post.

Q : *Timber is cheaper, why should I pay more for this ?*

A : Apart from the fact that this is easier to install than a timber mould, the mitre joints on a timber mould over a short period of time will begin to open up as they are effected by the weather, resulting in your magnificent looking post looking rather ugly. If you use our mould it will look exactly the same as the day you painted it.
