# HAMMERSMITH

# PRICE LIST

**EFFECTIVE 1ST SEPTEMBER 2022**
**SUPERSEDES 8TH NOVEMBER 2021**

This price list is designed to be read in conjunction with our website (hammersmith.com.au), and is effective from the 1st September 2022. It replaces our previous price list which was dated 8th November 2021. The price list is sorted alphabetically by Product Code; starting on page 3 with AA001R, and finishing on page 33 with SSW101-6.

**TIMBER and STAINLESS STEEL GRADES**

Timber is a natural product. No claims will be recognised on the basis of natural grain or colour pigment variation in the material supplied.

All timbers used in the manufacture of our products are kiln dried to acceptable standards & selected to match the best grades available.

Our range of Treated Timber Products are made from kiln dried Radiata Pine that has been treated with a Liquid Organic Solvent Preservative (LOSP) after machining. With some products the timber may be laminated and/or finger jointed (using glues suitable for external application). Most products will be of a clear grade, but small knots may appear in some items.

All of our range of stainless steel products are available in a 316 and/or 304 grade. 316 stainless steel has a higher level of corrosion resistance than 304, and should be used for all exterior applications, especially when close to sea water. For interior use, 304 stainless steel is suitable in most situations, unless close to sea water, where 316 grade is still the better option.

**PRICING**

Prices are correct as at the date of this price list, but are subject to change without notice. Our standard price is shown under the *$ Price* column. For all of our products we offer a % discount for buying over a set quantity, with some products having more than one discount level. This info is shown under the *Quantity Discount* columns. Eg : AA001R in H3 Treated Pine (on page 3) is $18.29, but if you order 50 or more, then you get a 10% discount, which brings the price down to $16.46 each. ALL PRICES ARE EXCLUSIVE OF GST.

**FREIGHT <<< Please refer to page 35 of this price list. >>>**

**PRODUCT SPECIFICATIONS AND USES**

All measurements (unless stated otherwise) are shown in millimetres (mm). Slight variations may occur over production runs.

Due to the vast range of uses our products could be put, no guarantee is offered regarding the suitability of our products for any particular use.

**STOCK AVAILABILITY & RETURNS**

Orders will be accepted in good faith but are subject to stock availability. Every effort will be made to complete orders in one delivery.

Products purchased may be returned for credit within 14 days of receipt of delivery provided our approval is given. No credits will be accepted for products that have been altered in anyway or put into use. Unless there has been a mistake made by us or the products are not of a useable quality, the cost of return will be at the customers' own expense.

There are some exceptions to this rule. Please refer to the REFUND policy on our website.

Freight is deemed (by us) to be oversized if the length of the product being shipped is over 0.9 metres. Freight of this length requires extra care and attention to make sure the products inside do not get damaged, as well as the fact that transport companies find them difficult to fit within their standard delivery services, and therefore charge us more.

If you are outside the metro zones of these cities, then you will need to use our FREIGHT ZONE CHART (available upon request) that uses a % of invoice value to calculate the rate of freight.

Please note that there is 1 exception to the freight rates shown above. If your order is able to be packed into an Australia Post Airbag (overnight service), then the freight will be charged out at standard airbag rates, which at the moment are $18 for a 3kg airbag and $25 for a 5kg airbag. These charges are for delivery anywhere within Australia.

## ABOUT HAMMERSMITH

Hammersmith Woodturners Pty. Ltd. opened for business back in 1946 when E.J. (Ted) Groth, a toolmaker by trade, started a small hand wood turning business in his back yard, manufacturing wooden souvenirs and turnings for the furniture trade.

In the early years the growth of the business was helped greatly by the 1956 Melbourne Olympics, and the use of wooden legs on the bottom of television sets.

The company purchased their first automated wood turning lathe in 1962, and have now expanded their collection to well over 20.

Drawing on his experience as a toolmaker, and having a fully equipped tool room, Ted was not only able to maintain and repair all specialised wood turning equipment, but also build machines to do special processes in cutting down on costly hand finishing.

In 1966 his son, Geoff, joined the business. After spending over 20 years in production and sales, Geoff went on to manage the company until his retirement in 2012. It was Geoff's early efforts "on the road" that helped the company expand into the many different areas that it is involved in today, including the building, staircase, and furniture industries throughout all parts of Australia.

Then in 1995, Geoff's son, Wyatt, became the third generation to work in this successful family business. Like his father, Wyatt has concentrated his efforts in customer relations, including the setting up of office and factory systems to ensure the customer's demands can be met both quickly and accurately. In 2012 Wyatt took over the role of managing of the business after his father retired.

In 2010, Wyatt's wife, Michelle, joined the company. Initially taking on the role as receptionist as well as marketing, but more recently has moved into managing accounts and payroll.

In recent years the decline in popularity of wood turnings has resulted in even more changes to the types of products manufactured; and now with 75 years of business behind them, they are a 100% freehold company that employs around 15 people; and whilst their past doesn't guarantee a future it certainly goes a long way to doing so.

## HAVE YOU SEEN OUR WEBSITE?

- It contains all of the products in this catalogue, as well as a few extra which are available for purchase online
- Larger photographs and detailed dimensioned CAD drawings can be viewed for all products
- The most current pricing for all products
- Current news stories about custom jobs that we have done or new products that we have just released
